To discuss the TD regarding 2016 NSPS OOOOa compliance reports:

Compliance reports for the 2016 NSPS OOOOa up until November 21, 2017, have been released as part of a FOIA request. The information in these reports may help with the 2016 NSPS OOOOa reconsideration effort. However, the data in these reports is in an inaccessible format (hard-copy PDF scan) and may require mostly manual review in order to obtain relevant information. Given this, we would like for the contractor to perform a scoping exercise with a portion of these reports to get a sense how long a full analysis might take and whether the information derived from these reports would be helpful. Specific items that information in the reports may help with include:

- *Assessing current assumptions for turnover rates*
- *Number of storage vessels in transmission and storage*
- *Natural gas storage wells*
